Project Portfolio

- ✂ Full-Stack Application Project [GuideBox](#) tech stack: MongoDB, Express, React, Node.js
Description: CapStone Project Inspired by how bad multi-network tv-guide web applications were I set out to create a video-uploader and tv-guide application.
The application allows users to upload videos and display them as tiles for all to see and play.
- ✂ Full-Stack Application Team Project [Bag of Holding](#) tech stack: JavaScript, jQuery, MongoDB, Mongoose, Express, Hurok, mLab, AWS
Description: A group project focusing on version control with GitHub to recreate Dropbox. In 3 days. The application allows users to store any type of file to a custom built remote server using Amazon S3.
- ✂ Full-Stack Application Project [Magic: the Gathering](#) tech stack: JavaScript, Ruby on Rails, PostgreSQL, Hurok
Description: Inspired by MTG I built a back-end custom API using PostgreSQL and Ruby on Rails and built a front-end client with JavaScript.
A major focus of the project was simple object oriented development and not allowing scope creep.
